

Web Page Creation using HTML, CSS and Bootstrap

Task List

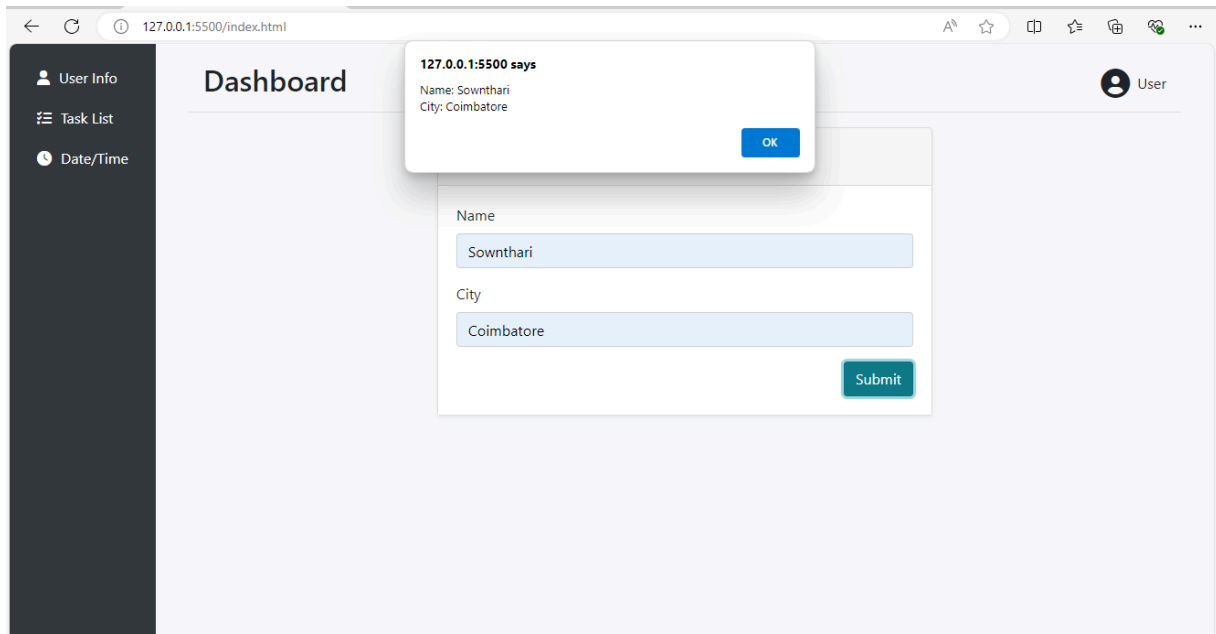

UI Screens:

User Information page

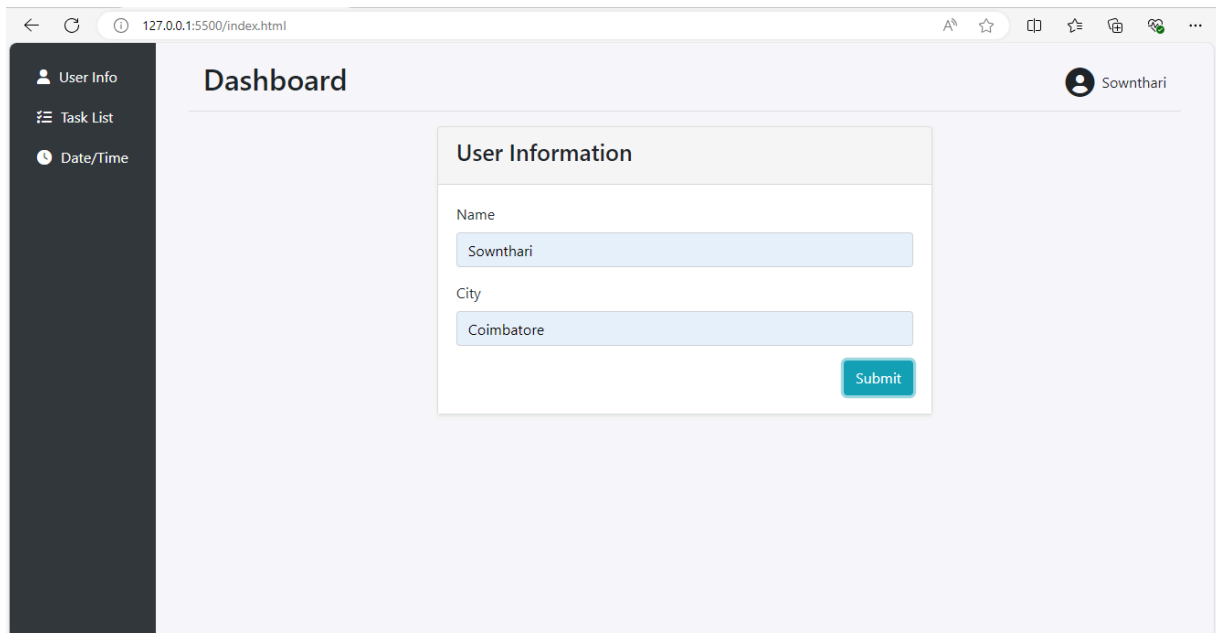

Laptop screen:

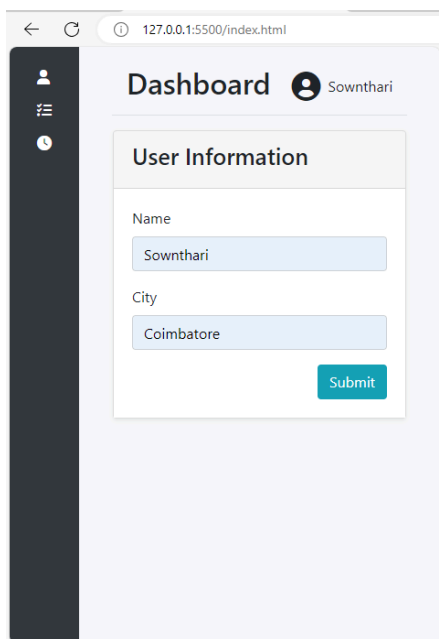

The screenshot shows a web browser window with the address bar displaying '127.0.0.1:5500/index.html'. The page has a dark sidebar on the left with three menu items: 'User Info' (selected), 'Task List', and 'Date/Time'. The main content area is titled 'Dashboard' and features a 'User Information' form. The form has two input fields: 'Name' and 'City', and a 'Submit' button. A user profile icon labeled 'User' is visible in the top right corner.

This screenshot shows the same 'Dashboard' page, but with a modal dialog box open. The dialog box has a title '127.0.0.1:5500 says' and contains the text 'Name: Sowthari' and 'City: Coimbatore', with an 'OK' button. The 'User Information' form in the background now has the text 'Sowthari' in the 'Name' field and 'Coimbatore' in the 'City' field. The 'Submit' button remains visible.
